NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

QUARTER II, 2025

I. OVERVIEW OF THE COMPANY

General information

Southern Gas Trading Joint Stock Company (“the Company”) is a shareholding company incorporated under the Law on Enterprise of Vietnam pursuant to the Business Registration Certificate No. 4103007397 issued by the Department of Planning and Investment of Ho Chi Minh City on 25 July 2007. The Company subsequently received the amended Enterprise Registration Certificates No. 0305097236 dated 15 May 2015, with the latest being the 23rd amended Enterprise Registration Certificate on 11 August 2022. The Company’s shares were listed on the Ha Noi Stock Exchange in accordance with trading code as PGS.

The Company's headquarters is located on the 4th Floor, PetroVietnam Building, No. 1-5 Le Duan Street, Sai Gon Ward, Ho Chi Minh City, Vietnam. The Company has a wholly-owned subsidiary, Vietnam Liquefied Gas Company Limited (VT Gas). Additionally, the Company operates branches in Dong Nai, Binh Khi, the Mekong Delta, Central Vietnam, and South-Central Vietnam.

Subsidiary

Vietnam Liquefied Gas Company Limited - VT Gas (started operating from April 1, 2020).

Principal activities

The Company’s main activities include the export and import of liquefied petroleum gas (LPG) (excluding operations in Ho Chi Minh City); the trading of LPG, gas products, materials, equipment, and means for transportation, storage, and cylinder filling of LPG (excluding LPG trading at the parent company's headquarters); the construction and investment consultancy of LPG facilities and gas industrial projects; technology transfer, operation, business, and maintenance of LPG-related projects; transportation of LPG and container-based freight transport; services related to LPG and gas products in the industrial, residential, and transportation sectors; the trading of gasoline, lubricants, and related additives; wholesale and retail of compressed natural gas (CNG); wholesale of fertilizers; real estate business; cargo handling services; production, bottling, and distribution of LPG and CNG; production of metal containers for compressed gas, LPG, and other gases; repair of metal tanks, containers, and painting, maintenance, and repair of storage tanks, reservoirs, pipelines, and LPG warehouses; wholesale of machinery, equipment, and spare parts; construction and completion of civil engineering works.

Normal operating cycle

The normal operating cycle of the Company is conducted within a period of no more than 12 months

II. BASIS OF PREPARATION OF CONSOLIDATED FINANCIAL STATEMENTS AND FISCAL YEAR

Basis of preparation of consolidated financial statements

The consolidated financial statements are presented in Vietnamese Dong (VND) and prepared in accordance with the guidelines of Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System, and other prevailing accounting regulations in Vietnam.

The accompanying consolidated financial statements (including the Consolidated Balance Sheet, Consolidated Income Statement, Consolidated Cash Flow Statement, and Notes to the Consolidated Financial Statements) are prepared based on accounting principles, procedures, and reporting practices widely accepted in Vietnam. Therefore, the use of these statements is not intended for parties unfamiliar with the accounting principles, procedures, and regulations in Vietnam, nor do they aim to reflect the financial position, operating results, and cash flows in accordance with accounting principles and practices generally accepted in countries outside of Vietnam.

Fiscal year

The Company's fiscal year begins on April 1 and ends on June 30. The Company's consolidated financial statements for the fourth quarter of 2025 are prepared for the operating period from 01 April 2025 to 30 June 2025.

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting estimates

The preparation of the consolidated financial statements complies with Vietnamese Accounting Standards, the Vietnamese Accounting System, and other prevailing accounting regulations in Vietnam, requiring the use of estimates and assumptions that affect the reported amounts of liabilities, assets, and the presentation of contingent liabilities and assets as of the date of the consolidated financial statements, as well as the reported amounts of revenue and expenses during the fiscal year. Actual business results may differ from the estimates and assumptions made.

Basis of consolidation of financial statements

The consolidated financial statements of the Company and its subsidiaries are prepared as of December 31 each year. Control is achieved when the

Company has the ability to direct the financial and operating policies of the investee companies to obtain benefits from their operations.

The operating results of subsidiaries acquired or disposed of during the year are included in the consolidated financial statements from the acquisition date or until the disposal date of the investment in those subsidiaries. Where necessary, the financial statements of the subsidiaries are adjusted to ensure that the accounting policies applied by the Company and its subsidiaries are consistent. Intercompany transactions and balances between subsidiaries within the Company are eliminated during the consolidation process.

The minority interest in the net assets of consolidated subsidiaries is presented as a separate item, distinct from the equity of the parent company's shareholders. Minority interest includes the value of the minority shareholders' interests as of the initial business combination date and their share in changes in total equity since the business combination date. Losses attributable to the minority interest exceeding their share in the total equity of the subsidiary are allocated to the Company's interest, except where the minority shareholders have a binding obligation and the ability to cover such losses.

Business combination

The assets, liabilities, and contingent liabilities of a subsidiary are measured at their fair values as of the acquisition date. Any excess of the purchase price over the total fair value of the acquired assets is recognized as goodwill. Any shortfall between the purchase price and the total fair value of the acquired assets is recognized in the profit or loss for the period in which the acquisition occurs.

The minority interest as of the initial business combination date is determined based on the minority shareholders' proportionate share in the total fair value of the recognized assets, liabilities, and contingent liabilities.

Investment in Associates

An associate is a company over which the Company has significant influence but is neither a subsidiary nor a joint venture of the Company. Significant influence refers to the ability to participate in the financial and operating policy decisions of the investee but without having control or joint control over those policies.

The operating results, assets, and liabilities of associates are included in the financial statements using the equity method. Investments in associates are presented in the Balance Sheet at cost, adjusted for changes in the Company's share of the net assets of the associates after the acquisition date. Losses of an associate that exceed the Company's investment in that associate (including any long-term interests that, in substance, form part of the Company's net investment in the associate) are not recognized.

Joint venture investments

Joint venture investments are contractual agreements under which the Company and other parties undertake economic activities based on joint control. Joint control refers to the shared authority, requiring unanimous consent of the joint venturers for strategic decisions concerning the operational and financial policies of the joint venture.

In cases where a member entity directly conducts business under joint venture agreements, the share of jointly controlled assets and any liabilities incurred jointly with other joint venture partners arising from the joint venture's activities are accounted for in the Company's financial statements and classified according to the nature of the transactions. Liabilities and expenses directly related to the Company's share of jointly controlled assets are accounted for on an accrual basis. Revenue from the sale or use of the Company's share of products derived from joint venture activities is recognized

Joint venture agreements involving the establishment of an independent business entity, in which the joint venture partners have equity participation, are referred to as jointly controlled entities. In the consolidated financial statements, investments in joint ventures are accounted for using the equity method. Goodwill arising from the acquisition of the Company's equity interest in a jointly controlled entity is accounted for in accordance with the Company's accounting policies related to goodwill acquired in a subsidiary acquisition.

In cases where the Company's subsidiaries engage in transactions with the Company's joint ventures, unrealized profits or losses corresponding to the Company's share in the joint venture are eliminated in the consolidated financial statements.

Goodwill

Goodwill in the consolidated financial statements represents the excess of the purchase price over the Company's share of the fair value of the assets, liabilities, and contingent liabilities of a subsidiary, associate, or jointly controlled entity as of the investment date. Goodwill is considered an intangible asset and is amortized on a straight-line basis over its estimated useful life, not exceeding 10 years.

Goodwill arising from the acquisition of an associate is included in the carrying amount of the associate. Goodwill from the acquisition of subsidiaries and jointly controlled entities is presented separately as an intangible asset on the Balance Sheet.

When a subsidiary, associate, or jointly controlled entity is sold, the unamortized carrying amount of goodwill is included in the calculation of the gain or loss on the disposal of the respective entity.

Negative Goodwill

Negative goodwill arises when the Company's share of the fair value of the identifiable assets, liabilities, and contingent liabilities of a subsidiary, associate, or jointly controlled entity at the acquisition date exceeds the purchase price. Negative goodwill is recognized immediately in the Income Statement.

Cash

Cash includes cash on hand, bank deposits, and cash in transit.

Accounts receivable

Accounts receivable represent amounts recoverable from customers or other parties. They are presented at their carrying amount, net of any allowance for doubtful accounts.

An allowance for doubtful accounts is established for receivables that are overdue by six months or more, or for receivables where the debtor is unlikely to settle due to liquidation, bankruptcy, or similar financial difficulties.

Inventory

Inventories are valued at the lower of cost and net realizable value. The cost of inventory includes purchase costs, processing costs, and other direct costs incurred to bring the inventory to its current location and condition. The cost of inventory is determined using the weighted average method. Net realizable value is calculated as the estimated selling price less the costs of completion and the estimated costs necessary to market, sell, and distribute the inventory.

The Company's provision for inventory devaluation is established in accordance with prevailing accounting regulations. Accordingly, the Company is allowed to make provisions for obsolete, damaged, or substandard inventory, and when the cost of inventory exceeds its net realizable value as of the end of the accounting period.

Tangible Fixed Assets and Depreciation

Tangible fixed assets are presented at cost less accumulated depreciation. The cost of tangible fixed assets acquired includes the purchase price and all directly related costs necessary to bring the asset to its ready-for-use condition. Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives, as follows:

	Years
Buildings and structures	05 - 25
Machinery and equipment	03 - 10
Vehicles	03 - 10
Office equipment	03 - 04
Other fixed assets	03 - 04

Intangible Fixed Assets and Amortization

Land use rights and computer software are presented at cost less accumulated amortization. Land use rights are amortized using the straight-line method over the lease term of the land.

The value of computer software is amortized and recognized as an expense over a period of 3 years.

Land use rights with indefinite terms are recognized on the Balance Sheet at cost and are not amortized.

Finance Lease Fixed Assets and Depreciation

A lease is classified as a finance lease when substantially all the risks and rewards of ownership of the asset are transferred to the lessee. All other leases are classified as operating leases.

The Company recognizes finance-leased assets as its own assets at the lower of the fair value of the leased asset at the lease inception or the present value of the minimum lease payments. A corresponding liability to the lessor is recorded on the Balance Sheet as a finance lease liability. Lease payments are apportioned between finance costs and the principal repayment to maintain a constant periodic interest rate on the remaining balance of the liability.

Finance costs are recognized in the Income Statement unless they are directly attributable to the acquisition of the leased asset, in which case they are capitalized in accordance with the Company's accounting policy for borrowing costs (as detailed below).

A lease is classified as an operating lease when the lessor retains substantially all the risks and rewards of ownership of the asset. Operating lease expenses are recognized in the Income Statement on a straight-line basis over the lease term. Any amounts received or receivable to facilitate the signing of an operating lease are also recognized on a straight-line basis over the lease term.

Finance-leased assets are depreciated over their estimated useful lives, similar to Company-owned assets, or over the lease term if shorter, as follows:

	Years
Machinery and equipment	05
Vehicles	03 - 06

Construction in progress

Assets under construction intended for production, leasing, management, or other purposes are recognized at cost. These costs include construction and installation expenses, equipment costs, other related expenses, and borrowing costs incurred in accordance with the Company's accounting policy. These costs are transferred to the cost of fixed assets at provisional values (if final settlements have not yet been approved) when the assets are completed and put into use.

Long-term prepayments

Long-term prepayments include costs related to gas cylinder shells pending allocation, prepaid land rent, office rent, and other long-term prepaid expenses.

Allocation of deposits and security deposits for gas cylinder shells received

Deposits and security deposits for gas cylinder shells received from customers are allocated to income over the allocation period of the gas cylinder shell value. The remaining unallocated deposit amounts are recorded under "Other long-term payables" in the Balance Sheet.

Revenue recognition

Revenue from the sale of goods is recognized when all the following five (5) conditions are satisfied:

- (a) The Company has transferred the significant risks and rewards of ownership of the goods to the buyer.
- (b) The Company no longer retains control over the goods or has managerial involvement as the owner.
- (c) The revenue can be reliably measured.
- (d) It is probable that the economic benefits associated with the transaction will flow to the Company.
- (e) The related costs of the sales transaction can be reliably measured.

Foreign currency translation

Foreign currency transactions are converted into VND at the interbank exchange rate on the transaction date. Exchange rate differences arising from these transactions are recognized in the income statement.

Monetary assets and liabilities denominated in foreign currencies at the end of the fiscal year are translated using the interbank average exchange rate at that date. Exchange rate differences arising from the revaluation of these balances are accounted for in accordance with Circular No. 179/2012/TT-BTC, issued on October 24, 2012, which provides guidance on the treatment of foreign exchange differences in enterprises.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction, or production of qualifying assets—those that require a substantial period of time to be ready for use or sale—are capitalized as part of the cost of the asset until the asset is ready for its intended use or sale. Any income earned from the temporary investment of borrowed funds is deducted from the cost of the related asset.

All other borrowing costs are recognized as an expense in the Income Statement when incurred.

Corporate income tax

Corporate income tax (CIT) represents the total amount of current tax payable and deferred tax. The Company is obligated to pay CIT at a tax rate of 20% on taxable income.

IV. SUPPLEMENTARY INFORMATION FOR ITEMS PRESENTED IN THE BALANCE SHEET

13- The department by business area and the department by

The Company's main business activities are the trading of LPG and CNG gases. Additionally, other business activities mainly include the trading of gasoline, oil, lubricants, the production and trading of gas cylinder shells, providing gas cylinder maintenance and repair services, and warehouse leasing. Revenue from other business activities accounts for only a very small proportion of total revenue (0.47% in Q2 2025 and 0.42% in Q2 2024). Revenue and cost of goods sold from these business activities are presented in Notes 14 and 15 of the consolidated financial statements.

Geographically, the Company operates only within the territory of Vietnam. Therefore, the Board of Directors has assessed and believes that the decision not to prepare and present segment reports based on business area and geographical area in the consolidated financial statements for the period from 01 April 2025 to 30 June 2025, is in compliance with the provisions of Vietnamese Accounting Standard No. 28 "Segment Reporting" and is consistent with the current business situation of the Company.
